

Serial No. 09/607007

- 2 -

Art Unit:2143

In the Specification:

Please replace the paragraph on page 16 spanning lines 8-18 with:

Computer program logic implementing all or part of the functionality previously described herein may be embodied in various forms, including, but in no way limited to, a source code form, a computer executable form, and various intermediate forms (e.g., forms generated by an assembler, compiler, linker, or locator). Source code may include a series of computer program instructions implemented in any of various programming languages (e.g., an object code, an assembly language, or a high-level language such as Fortran, C, C++, JAVATM, or HTML) for use with various operating system or operating environments. The source code may define and use various data structures and communication messages. The source code may be in a computer executable form (e.g., via an interpreter), or the source code may be converted(e.g., via a translator, assembler, or compiler) into a computer executable form.
